MILOS | THE ISLAND OF VENUS

TOUR TYPE: Cultural

SHORE EXCURSION: 4 Hours

ACTIVITY LEVEL: Easy

RECOMMENDED DRESS: Comfortable shoes, hat, sunscreen, sunglasses

No Wheelchair accessibility

Milos is a beautiful Greek island located in the Aegean Sea, famous for its unique volcanic landscape, rich history, and crystal-clear waters. The island's name, Milos, is derived from the ancient word "Milos," which is thought to be related to the term "milos" for "apple," symbolizing the island's fertile lands. Known for its spectacular beaches and charming villages, Milos is a perfect destination for those looking to explore both natural beauty and history.

MILOS HISTORICAL EXPLORATION

Instead of swimming, you can spend your time exploring the incredible volcanic island of Milos, one of the most beautiful places on earth. Starting from **SARAKINIKO**, an inlet of pure volcanic white landscape, formed by nature. The beach is renowned for its unique white volcanic rock formations, which create a surreal and otherworldly atmosphere and contains one of the island's many geological wonders and perhaps one of the most photographed places in the Cyclades. While feeling that we have landed on the moon, we will walk down to the inlet so you can experience this one-of-a-kind beach.

Following our visit to Sarakiniko, the next stop on our journey will be **PLAKA**, the island's charming capital resting on a hilltop! Plaka is a traditional village characterized by narrow, winding streets, whitewashed houses decorated exterior with bougainvillea flowers, cobblestone streets and alleys and stunning views of the Aegean Sea. Visitors can explore the local shops, enjoy delicacies from local bakeries, and take in the breathtaking panoramic views from the top of the village, where the Plaka Castle stands.

Very close to Plaka, next to Trypiti village, we will visit the ruins of ancient Milos and its **ROMAN AMPHITHEATER**, an archaeological site dating back to the Roman period. The Amphitheater was built in the 1st century BC and could hold up to 7,000 spectators. It is a remarkable example of Roman architecture, being cut into the rocky slope of the hill near the ancient agora. There you'll find large Dorian walls and column fragments. The marble amphitheater, fully restored in 2015, still includes seven intact rows of seats and offers a lovely view of the bay. On our way back to the bus, we will visit the site where the VENUS OF MILO (now residing in the Louvre in Paris), was discovered in 1820.
